Drip Irrigation Systems

Drip irrigation is today's need because Water – nature's gift to mankind is not unlimited and free forever. World water resources are fast diminishing. The one and only answer to this problem is Jain Drip Irrigation Systems. **"Jain Drip"** the name which you can trust, the only manufacturer of all drip irrigation components.

After detailed study of inter–relationship among soil, water, crop, land terrain and related agro climatic conditions, Jains designed a suitable and economically viable system to deliver a measured quantity of water at the root zone of each plant at regular intervals. This is to ensure that the plants do not suffer from stress or strain of less and over watering. The system installed at the farmer's field is commissioned and training imparted to the farmer, followed by regular after sales services.

The result – A totally customized, efficient and long–life system which ensures saving in water, early maturity and a bountiful harvest, season after season, year after year. Apart from all this, savings in labour and fertilizer costs are accomplished.

By installing Jain Drip, you will be a member of a happy family of Jain Drip System owners.
